Dear FCC-I am writing to defend XM Radio and other satellite providers' ability to provide Instant Traffic & Weather. I pay for this service every month. I love the quality and variety I have never had before. The service is well worth the money and they should not be regulated in what they broadcast. Please reject NAB's petition 04-160. I don't think they should tell me I can't get something I pay for every month. Radio has never been as good as it is now with satellite radio.  
Thank you- Bob Pullum
